Incentives for demand response

Roar Amundsveen

Senior Adviser, the Norwegian Energy Regulatory Authority

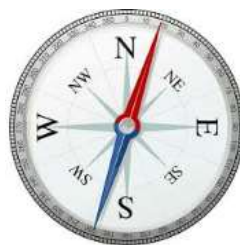

Our regulatory compass

Markets where possible, monopoly when necessary

Transparent and liquid markets, trade on organised markets

Prices that reflects supply, demand, grid topology - at all time periods and in the whole value-chain

Technology neutral and market based system operation

Neutral, efficient and competent Network companies and TSO

Smart meters & Cost-reflective grid tariffs

Pilots and testing of new technologies and solutions

Ensure transparent information, and protection of consumers
Increased focus on cyber security and data protection

In a rapidly changing world and more complex systems,
→ future regulatory role will be more challenging
Insight, knowledge and holistic approach is essential

SO YOU DON'T PAY MORE THAN NECESSARY
