

Nordic customer survey 2022

Appendix E

Table report: Sweden

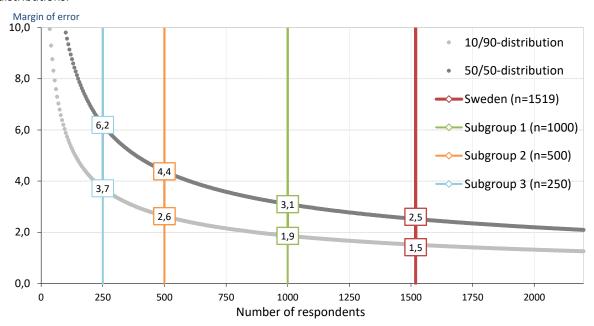

About the survey

Sample and data collection

The sample consisted of a total of 6,036 respondents – at least 1,500 from each of the four Nordic countries (1,501 from Denmark, 1,515 from Finland, 1,501 from Norway, and 1,519 from Sweden). All respondents were over the age of 25 and stated that they took part in the decision-making regarding the electricity contract in their household. The survey was conducted online, among a pre-recruited web panel of respondents willing to participate in various surveys. The survey was fielded 25. May -20. June 2022 (a pilot survey consisting of 394 respondents was conducted 10.-17. May 2022).

Margin of error

In all surveys, one needs to consider the margins of error. These depend on the sample size as well as on the results: The more heterogenous the sample, the larger the margins of error. In this survey the sample consists of 1,519 respondents from Sweden, and the margins of error will vary from +/- 1,5 percentage points (10/90-distribution) to +/- 2,5 percentage points (50/50-distribution). When the results are broken down by subgroups, such as country and other background variables, the margins of error will increase (due to smaller sample size). The figure below shows the margins of error given different sample sizes and different distributions.

Average scores

When the respondents were asked to consider different statements, their responses were given on a five-point scale. For instance, respondents were asked to consider whether they disagree or agree with different statements on a scale from "1 = Fully disagree" to "5 = Fully agree". In addition to presenting the results on the original scale, the original five-point scale is recoded into scores on a scale from 0 to 100 where, for instance, 0 is the least amount of agreement ("Fully disagree") and 100 is the highest amount of agreement ("Fully agree").

Significance tests

Significant differences between 2018 and 2022 or between subgroups such as customer profiles, gender, age, and residence type are marked in the tables and figures in this report. The significance level is set to 0.05 (this indicates that there is a 5% probability of incorrectly rejecting the null hypothesis, for example, that there is no correlation between age and the responses).

Chi-squared test/ANOVA-test: The asterisk (*) indicates that the differences between the groups shown in the table/figure, e.g., between the different age groups, are statistically significant. For multiple response questions, the * indicates that differences for at least one of the categories are significant. Arrows and blue/red background indicate that the share/average score is significantly higher/lower than for the contrasting group. E.g., if the share among respondents under 35 is higher than the share among (all) older respondents.

Contents

Customer type	6
How do you receive your electricity bill?	7
Gender	8
Type of residence:	9
What kind of electricity contract do you have today?	10
Approximately how many kilowatt-hours do you use each year?	11
Approximately how many kilowatt-hours do you use each year? (shares of respondents who know their annual kWh use)	12
Do you believe the following statements are correct or not? - My electricity supplier is determined by where I live	13
Do you believe the following statements are correct or not? - As a customer I can choose my own electricity supplier	14
Do you believe the following statements are correct or not? - If I switch to another supplier, my meter has to be changed	
Do you believe the following statements are correct or not? - If I switch to another supplier, it can affect the number of power cuts	16
Do you believe the following statements are correct or not? - If I switch to another supplier, the new supplier will be in charge of meter reading	
Name the company that operates the power lines where you live:	18
Who is the electricity supplier for your household? Fill in the name of the company:	19
Can you name two other electricity suppliers?	20
Total knowledge of electricity suppliers.	21
Total knowledge of the electricity market.	22
Have you ever signed a contract with an electricity supplier?	23
When did you last sign a contract with an electricity supplier?	24
Why did you sign a new electricity contract?	25
Have you ever compared your current electricity contract to other contracts?	26
When did you last compare your current electricity contract to other contracts?	27
You have compared different offers but decided to stay in your current contract. Why?	28
Why have you not switched or compared contracts more often?	29
Why have you never switched or compared contracts?	30
Who initiated the signing of your current contract?	31
How did you go about choosing electricity contract?	32
How did they contact you?	33
When you think of your current electricity contract, are you aware of: - If the price can change during the contract term	34
When you think of your current electricity contract, are you aware of: - The binding period (Binding period is the time that you will have to stay with the same supplier)	
When you think of your current electricity contract, are you aware of: - The notice period of the contract (Notice period is the time that you have to stay with the supplier after you have given a notice of termination)	3€

When you think of your current electricity contract, are you aware of: - The consequence if you terminate the contract before the binding period expires	
When you think of your current electricity contract, are you aware of: - If the contract is green (electricity	
from renewable energy sources, for example hydro, solar or wind)	38
When you think of your current electricity contract, are you aware of: - The effective unit rate where all fixed and variable fees are included	39
Before you made your current choice of electricity contract, to what extent did you experience the following: - It was easy to find trustworthy information and necessary advice	40
Before you made your current choice of electricity contract, to what extent did you experience the following: - It was easy and straightforward to sign an electricity contract	42
Before you made your current choice of electricity contract, to what extent did you experience the following: - I could easily compare different electricity contracts with each other	44
Before you made your current choice of electricity contract, to what extent did you experience the following: - I trusted the information and advice from sellers	46
Before you made your current choice of electricity contract, to what extent did you experience the following: - There were many different electricity suppliers to choose from that meet my needs	48
Before you made your current choice of electricity contract, to what extent did you experience the following: - There were many different products/contracts to choose from that meet my needs	
Before you made your current choice of electricity contract, to what extent did you experience the following: - It was easy to understand what is included in the price / agreement	
Before you made your current choice of electricity contract, to what extent did you experience the following: - I was well-informed	
When you signed/compared your current electricity contract, did you visit an online comparison tool?	
What comparison tool(s) did you visit online?	
After you signed your current contract, did you experience problems with your new electricity supplier?	
What kind of problem did you experience?	
In what way were you misled or cheated by the seller?	
Did you make a complaint regarding your problem?	
Did your problem get fixed due to your complaint?	
How satisfied were you with the outcome of your complaint?	
If you in the future need to choose an electricity contract, to what extent do you agree that: - It will be	05
easy to find trustworthy information and necessary advice	65
If you in the future need to choose an electricity contract, to what extent do you agree that: - It will be	
easy and straightforward to sign an electricity contract	67
If you in the future need to choose an electricity contract, to what extent do you agree that: - It will be	
easy to compare different electricity contracts with each other	69
If you in the future need to choose an electricity contract, to what extent do you agree that: - I will trust the information and advice from sellers	71
If you in the future need to choose an electricity contract, to what extent do you agree that: - There will	
be many different electricity suppliers to choose from that meet my needs	73
If you in the future need to choose an electricity contract, to what extent do you agree that: - There will be many different contracts to choose from that meet my needs	75
If you in the future need to choose an electricity contract, to what extent do you agree that: - It will be	
easy to understand what is included in the price / agreement	77

If you in the future need to choose an electricity contract, to what extent do you agree that: - I will be well-informed	79
Do you know of any online comparison tools for electricity contracts?	81
What comparison tool(s) have you visited online?	82
To what extent do you agree with the following statements: - It is easy to switch supplier	83
To what extent do you agree with the following statements: - I regularly compare electricity contracts	85
To what extent do you agree with the following statements: - I can save money by switching electricity contract	87
To what extent do you agree with the following statements: - I would like to be better informed about the price I pay for electricity	
To what extent do you agree with the following statements: - My bill is simple and easy to understand	91
To what extent do you agree with the following statements: - It is important to have a green electricity contract (electricity from renewable energy sources, for example hydro, solar or wind)	93
To what extent do you agree with the following statements: - I want to get updated information about my consumption (e.g. online or in an app)	•
To what extent do you agree with the following statements: - The high electricity prices will affect my future choice of electricity contract	97
To what extent has your household economy been affected by the high electricity prices?	99
Do you read the information presented on your electricity bill?	101
What information do you read on your electricity bill? - I look at the total amount I have to pay	102
What information do you read on your electricity bill? - I look at the specification of the different price elements that my electricity cost is based on	103
What information do you read on your electricity bill? - I look at the specification of the electricity consumption that my bill is based on	104
What information do you read on your electricity bill? - I look at the date when my contract expires	105
What information do you read on your electricity bill? - I look at my estimated yearly consumption	106
What information do you read on your electricity bill? - I look at my historical consumption	107
What information do you read on your electricity bill? - I look at the information on how my electricity is produced (for example, hydro, nuclear, wind, fossil)	108
What information do you read on your electricity bill? - I look for notifications of changes that affect my electricity price	109
What information do you read on your electricity bill? - I look at the information about which bodies I can	
turn to for independent user advice, dispute resolution or if I have complaints	
What information do you read on your electricity bill? - Other	
How do you prefer to get information from your electricity supplier?	112
