

CAPACITIES ON THE DK1-DE BORDER

Minimum available hourly capacity due to the finalization of the East Coast Project will increase yearly with 96 MW from 2021-2026. TenneT's Guaranteed Hourly NTC will further increase with the future commissioning of the West Coast Line by means of a linear trajectory of additional 750 MW.

WORKSHOP 2

ALTERNATIVE COUNTERTRADE MODELS

Energinet facilitated August 2020 the first online workshop for market participants. At the workshop legal developments related to countertrade, and challenges with the current countertrade model, was presented together with initial thoughts on alternative countertrade models.

Energinet is facilitating a second online workshop on January 12th 2021 where the timeline, legal requirements and pre-analysis of alternative countertrade models are presented and will be discussed with workshop participants

Workshop 2: 12 January 2021 from
10:00 am – 02:00 pm
